

```
MyClass t1 = new MyClass( 10
);
MyClass t2 = new MyClass( 20
);
Console.WriteLine(t1.toString()
+ " " + t2.toString());
}
}
```

Select one:

- ☒ a. the toString method  is declared private and cannot be accessed
- ☐ b. the constructor must be without parameters
- ☐ c. the instance variable x is declared private and cannot be accessed directly
- ☐ d. the constructor have to return a value of x

The correct answer is: the toString method is declared private and cannot be

The rectangle in a flowchart indicates the المستطيل

إختر أحد الخيارات:

.A decision .a ☐

An input or output .b ☐

.instruction

.A process .c ☒

A module to be .d ☐

.processed

سؤال 3

تم/كامل

☐ average speed= distance / time

☐ time = distance / average speed

☐ Read distance

☐ read average speed

الوقت المتبقي

Algorithm to find the average speed of a car, considering that the journey time is 10 hours and the distance travelled is 1000 Kms is

INPUT: distance, time, and average speed

OUTPUT: average speed

PROCESSING

1. Read distance

2. read average speed

3.  $\text{time} = \text{distance} / \text{average speed}$

4.  $\text{average speed} = \text{distance} / \text{time}$

يرجى الإجابة على جميع أجزاء السؤال.

Marked out of 1

🚩 Flag question

The rectangle المستطيل in a flowchart indicates:

Select one:

- ☐ a. A process.
- ☐ b. An input or output instruction.
- ☐ c. A module to be processed.
- ☐ d. A decision.

🚩 Flag question

The flowchart symbol that represents input

Select one:

- ☐ a. rectangle (مستطيل)
- ☐ b. Parallelogram (متوازي الاضلاع)
- ☐ c. trapezium (معين منحرف)
- ☐ d. circle (دائرة)

In a flowchart how are symbols connected?

Select one:

- ☐ a. With solid lines to link events
- ☐ b. With dashed lines and numbers
- ☐ c. Symbols do not get connected together in a flowchart
- ☐ d. With lines and an arrow to show direction of flow

Program Analysis Chart (PAC) to compute and display the temperature inside the earth in Celsius and Fahrenheit. The relevant formulas are

$$\text{Celsius} = 10 \times (\text{depth}) + 20$$

$$\text{Fahrenheit} = 1.8 \times (\text{Celsius}) + 32$$

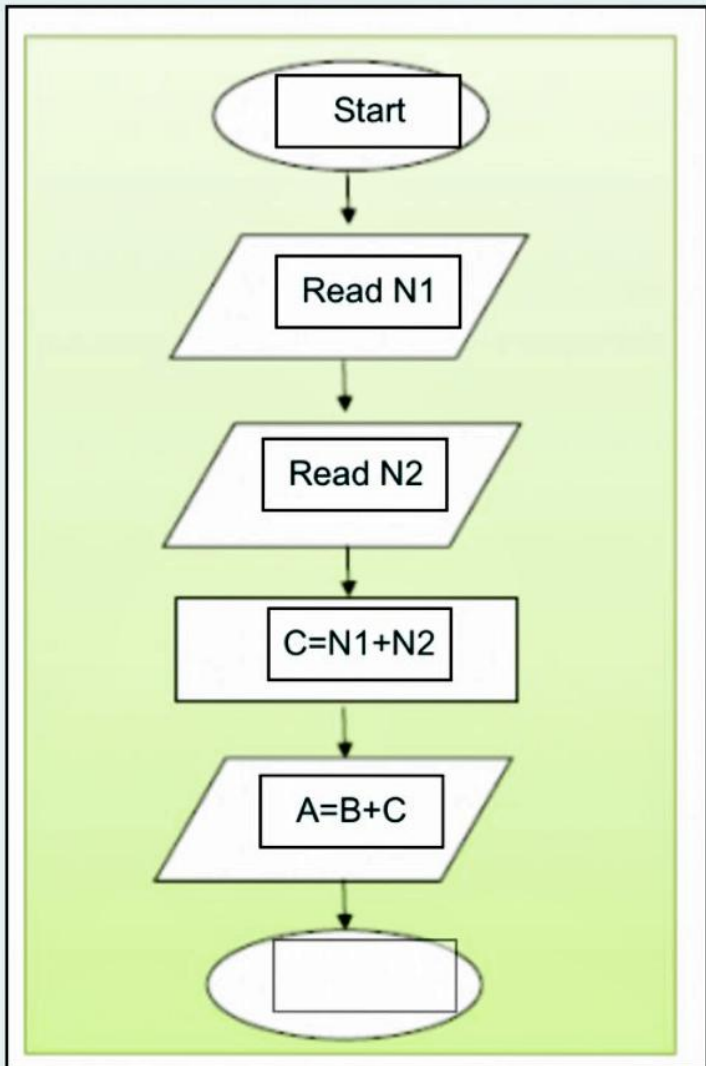

أكمل مخطط تحليل المشكلة (PAC) لحساب وعرض درجة الحرارة في باطن الأرض بدرجة مئوية وفهرنهايت.

depth = عمق

Data	Processing	Output
<div>celsius fahr</div>	<div>fahr = 1.8 * (celsius) + 32 celsius = 10 * (depth) + 20</div>	<div>depth</div>

Construct a flow chart  
then N2, and finally prints the sum  
of the two numbers

Flag question

In the development of a solution:

Select one:

- ☐ a. The IPO chart is developed first.
- ☐ b. The PAC is developed first.
- ☐ c. The algorithms and flowcharts are developed together.
- ☐ d. a and C.
- ☐ e. b and C.
- ☐ f. None of the above.

START

```
graph TD; Start([START]) --> ReadPrice[/READ PRICE/]; ReadPrice --> ReadQuantity[/READ QUANTITY/]; ReadQuantity --> Process[SALE = PRICE QUANTITY]; Process --> PrintSale[/PRINT SALE/]; PrintSale --> Stop([STOP]);
```

A flowchart illustrating a process to calculate a sale amount. It begins with an oval 'START' terminal, followed by a parallelogram 'READ PRICE' input, then another parallelogram 'READ QUANTITY' input. These lead to a rectangular process box containing the formula 'SALE = PRICE QUANTITY'. This is followed by a parallelogram 'PRINT SALE' output, and finally an oval 'STOP' terminal. Arrows connect each step in sequence.

READ  
PRICE

READ  
QUANTITY

SALE = PRICE  
QUANTITY

PRINT  
SALE

STOP

## Question 1

Correct

Mark 1 out of 1

🚩 Flag question

The \_\_\_\_\_ creates an object in memory and returns a reference to that object.

Select one:

- ☐ a. % operator
- ☐ b. .NET Framework
- ☐ c. = operator
- ☒ d. new operator

The correct answer is:  
new operator

## Question 2

Correct

Mark 1 out of 1

How would the following method header be represented in a UML class diagram?

```
public void DisplayMessage()
```

- ☒ a. + DisplayMessage(   
courseName: string )
- ☐ b. + DisplayMessage()
- ☐ c. + DisplayMessage(  
courseName )
- ☐ d. + DisplayMessage( string  
)

The correct answer is: +  
DisplayMessage( courseName:  
string )

Match the following

Public  
methods

provide service

Public  
Variables

violate encaps

Private  
variables

enforce encaps

The correct answer is:  
Public methods →  
provide services to  
clients, Public Variables  
→ violate  
encapsulation, Private  
variables → enforce  
encapsulation

Keyword 'this' is used to reference :

Select one:

- ☐ a. the object itself.
- ☐ b. the entry point of the program.
- ☐ c. what the programmer specified.
- ☒ d. the method itself ✗

The correct answer is:  
the object itself.

## Question 2

Correct

Mark 1 out of 1

🚩 Flag question

The combination of a method name and its parameter list is also called the \_\_\_\_.

Select one:

- ☒ a. method signature 
- ☐ b. method header
- ☐ c. argument list
- ☐ d. method body

The correct answer is: method signature

## Question 3

Correct

Mark 2 out of 2

🚩 Flag question

## Question 8

Incorrect

Mark 0 out of 1

🚩 Flag question

A variable that is used to reference an object is commonly called a ( n )  
-----.

Select one:

- ☐ a. class variable
- ☐ b. Boolean variable
- ☒ c. reference variable ✗
- ☐ d. object variable

The correct answer is: class variable

## Question 9

Correct

Mark 1 out of 1

🚩 Flag question

1. Based on the below UML diagram, write the implementation code to represent each class?
2. in the main method of Booktest class create:

- an Author object named a1 with following information (first name is Ali and last name is Romman)
- a Book object named book1 with

## Question 5

Correct

Mark 1 out of 1

🚩 Flag question

To call a static method, use the \_\_\_\_\_ name followed by a period, and the method with its arguments.

- ☐ a. instance variable's
- ☐ b. namespace's
- ☒ c. class's
- ☐ d. All of these

The correct answer is: class's

Correct

Mark 1 out of 1

Flag question

A value-returning statement must have a(n) \_\_\_\_\_ statement.

Select one:

- ☐ a. logical
- ☐ b. assignment
- ☒ c. return
- ☐ d. void

The correct answer is:  
return

Mark 1 out of 1

🚩 Flag question

The \_\_\_\_\_ creates an object in memory and returns a reference to that object.

Select one:

- ☐ a. = operator
- ☐ b. % operator
- ☐ c. .NET Framework
- ☒ d. `new` operator ✓

The correct answer is:  
`new` operator

## Question 9

Correct

Mark 1 out of 1

🚩 Flag question

Once you have created a `Random` object, you can call its \_\_\_\_\_ method to get a random integer number.

Select one:

- ☐ a. `GenerateNumber`
- ☐ b. `GetInteger`
- ☐ c. `NextInteger`
- ☒ d. `Next`

The correct answer is: `Next`

## Question 10

Correct

Mark 1 out of 1

🚩 Flag question
