question

blue background.

At 4:30 pm, she decides that she would like to use a different shape instead, and so needs to remove the circle. She plans to select the circle and then use the 'Cut' command, and she knows how to do this.

At 4:32 pm, she selects the circle by clicking on it, and then selects 'Cut' from the Edit menu, to cut away the circle. She looks at the resulting image and is satisfied to see that the circle has indeed gone.

Indicate whether the statements below in connection with the instance described above are True or False.

PerfectPaint ، برنامج لإنشاء ومعالجة الصور. حتى الآن ، أنشأت صورة دائرة حمراء على خلفية زرقاء. في الساعة 4:30 مساءً ، قررت أنها ترغب في استخدام شكل مختلف بدلاً من ذلك ، لذا تحتاج إلى إزالة الدائرة. تخطط لتحديد الدائرة ثم تستخدم أمر "قص" ، وهي تعرف كيفية القيام بذلك.

في الساعة 4:32 مساءً ، اختارت الدائرة بالنقر فوقها ، ثم حددت "قص" من قائمة "تحرير" لقطع الدائرة. تنظر إلى الصورة الناتجة وهي راضية عن رؤية الدائرة تختفي بالفعل. حدد ما إذا كانت العبارات أدناه فيما يتعلق بالمثل الموضح أعلاه صحيحة أم خاطئة.

a) At 4:30 pm described above the user is experiencing a gulf of execution.

☒ True☐ False

b) At 4:32 pm the user applies what she knows of the Windows language of interaction when she selects the 'Cut' option from the menu.

☒ True☐ False

c) The user's conceptual model of how PerfectPaint works is the same at 4:32pm as it was at 4:30pm.

☒ True☐ False

required.  
Indicate whether the statements below in connection with the instance described above and the theory surrounding Command Language Grammar are True or False:

يتفاعل المستخدم مع نظام يتتبع الطائرات عبر المحيط الأطلسي. لتغيير الارتفاع المستهدف للطائرة ما ، يجب على المستخدم تحديد صورة الطائرة ثم تحديد "تغيير الارتفاع" من شريط القائمة ثم كتابة الارتفاع الجديد المطلوب.  
وصح ما إذا كانت العبارات أدناه فيما يتعلق بالمثيل الموصوف أعلاه والنظرية المحيطة بقواعد لغة الأمر صحيحة أم خطأ:

a) The task level of the language of interaction is concerned with (معني ب) the placing of interaction objects on the interface.

☒ True

☐ False

b) The sequence of actions, selecting the plane, selecting 'Change Height' and typing in the new height, represents the semantics of the language of interaction.

☒ True

☐ False

c) The image of the plane on the screen represents a user's mental object.

☒ True

☐ False

## Question 14

Answer saved

Marked out of 3

Flag question

Explain the term "recognition over recall"

Format ▾ B I [List Icons] [Link Icons] [Image Icons]

Multiple choice: you can recognize the answer

Essay: you must recall the answer

A computer with a GUI allows us to recognize commands on a menu, instead of remembering them as in DOS and UNIX.

Command-based interfaces require users to recall from memory a name from a possible set of 100s.

GUIs provide visually-based options that users need only browse through until they recognize one.

Web browsers, MP3 players, etc., provide lists of visited URLs, song titles etc., that support recognition memory.

"Recognition over recall" refers to a design principle that makes it easier for individuals to recognize information when it is presented to them, rather than relying on their memory to recall the information. This is achieved by providing solutions or options that facilitate users in recognizing the correct answer, as opposed to expecting them to recall it independently.

3

Flag  
question

Below are several statements, which refer to the use of word processing software that runs under a Windows environment, and also to design principles contained in the Microsoft Style Guidelines. For each statement below concerning a design principle, indicate whether it is true or false.

فيما يلي عدة عبارات تشير إلى استخدام برامج معالجة النصوص التي تعمل في بيئة Windows ، وكذلك إلى مبادئ التصميم الواردة في إرشادات نمط Microsoft.

لكل بيان أدناه فيما يتعلق بمبدأ التصميم ، حدد ما إذا كان صحيحًا أم خطأ.

a) Text can be selected by using the mouse pointer, pressing the mouse button and dragging to select the required text. This is a good example of following the Directness principle.

☒ True

☐ False

b) An alternative way to select text is by using keys on the keyboard: the cursor is positioned at the start of the text to be selected, and Shift is held down whilst arrow keys are used to select the required text. This is a good example of following the Forgiveness principle.

☒ True

☐ False

c) Any text that has been selected is displayed on the screen highlighted, compared to the rest of the text. This is a good example of Offer informative Feedback principle.

☒ True

☐ False

Question 4

Answer saved

Marked out of 3

Flag question

Explain using examples three techniques that can be used to guide user's attention to important information on the interface?

اشرح باستخدام أمثلة ثلاث تقنيات يمكن استخدامها لتوجيه انتباه المستخدم إلى المعلومات المهمة على الواجهة؟

### 1. Padded Block Links

Links (or anchors) are inline elements by default, which means that their clickable area spans only the height and width of the text. This clickable area, or the space where you can click to go to that link's destination, can be increased for greater usability. We can do this by adding padding and, in some cases, also converting the link into a block element.

### 2. Typesetting Buttons

Attention to every detail is what separates a great product from a mediocre one. Interface elements such as buttons and tabs are clicked on many times a day by your users, so it pays to typeset them properly; and by typesetting I mean positioning the label.

### 3. Using Contrast To Manage Focus

Question 5

Answer saved

Marked out of 4

 Remove flag

Choose the most appropriate word from Symmetry, Similarity, Closure, Continuity or Proximity to describe each of the Gestalt grouping descriptions beneath.

1. Objects arranged regularly, but which are close vertically, tend to be grouped in rows

Symmetry

2. Objects of similar shape or color will be perceived to be grouped together

Similarity

3. Objects which follow each other in an un-broken line are grouped together

Proximity

4. Even though parts of regular objects are missing, we tend to fill in the gaps

Continuity

## Question 8

Answer saved

Marked out of 3

Flag question

A user interacts with a system that tracks airliners across the Atlantic. In order to change the target height of a plane the user must select the image of plane then select 'Change height' from the menu bar and then type in the new height that is required.

Indicate whether the statements below in connection with the instance described above and the theory surrounding Command Language Grammar are True or False:

يتفاعل المستخدم مع نظام يتتبع الطائرات عبر المحيط الأطلسي. لتغيير الارتفاع المستهدف لطائره ما ، يجب على المستخدم تحديد صورة الطائره ثم تحديد "تغيير الارتفاع" من شريط القائمة ثم كتابة الارتفاع الجديد المطلوب.

وضح ما إذا كانت العبارات أدناه فيما يتعلق بالسيناريو الموصوف أعلاه والنظرية المحيطة بقواعد لغة الأمر (Command Language Grammar) صحيحة أم خطأ:

a) The task level of the language of interaction is concerned with (معني ب) the placing of interaction objects on the interface.

☒ True

☐ False

b) The sequence of actions, selecting the plane, selecting 'Change Height' and typing in the new height, represents the semantics of the language of interaction.

☒ True

☐ False

c) The image of the plane on the screen represents a user's mental object.

☐ True

☒ False

- # What is HCI?
- “Human Computer Interaction is a discipline concerned with the design, evaluation and implementation of interactive computing systems for human use and with the study of the major phenomena surrounding them.”
    - As defined by the Special Interest Group on Human-Computer Interaction (SIGCHI) of the Association for Computing Machinery (ACM)

Flag question

### Application Style Guide

- Explain the aim of Application Style Guide.
- Give two Quality criteria an Application Style Guide have to assure
- Explain who the user and the developer will benefit from the Application Style Guide

Format ▾ B I [List Icons] [Image Icon] [Table Icon]

- To select a style which enhances usability by being appropriate to the users and their tasks
  - being well structured;
  - being unambiguous;
  - A more consistent user interface
- Increased user productivity, because a consistent style reduces what users need to learn and remember, resulting in shorter training time and fewer user errors.
- Reduction in the huge range of choices offered to GUI designers in

layout, font sizes and styles, window controls

- To select a style which enhances usability by being appropriate to the users and their tasks
